Payment Terms: Net 30

Agreement Summary:

Each year, over 350,000 Americans die from Sudden Cardiac Arrest. As the chance for survival decreases by 10% for every minute someone is in arrest, survival may be greatly increased with the application of Cardio-Pulmonary Resuscitation (CPR) and the use of an AED. An AED is a safe and easy-to-use device, specifically designed so that almost anyone with the proper training can use it successfully in the treatment of someone experiencing cardiac arrest. Dedicated to raising the standard of care, Horizon Resource

Group has established an AED Program, providing quality and affordable heart defibrillators and CPR training.

LifeGuard Medical Solutions, a leader in the implementation and management of AED Programs, has been selected based on price, quality and service of the Philips HeartStart OnSite Heart Defibrillator. Manufactured by Philips Medical Systems, the world leader in the AED industry, the Philips OnSite Heart Defibrillator has built-in safeguards against injury to both patient and responder. The Philips OnSite comes complete with audible voice prompts, which guide the responder through the entire rescue process.

LifeGuard Medical Solutions offers a discount structure and pricing advantages exclusive to the member institutions of Horizon Resource Group. 2-year CPR/AED Training Certification courses, nationally recognized by the American Heart Association, are also offered to Horizon members at discounted rates. LifeGuard Medical Solutions may administer this training on-site.

Saving Even More Lives With Each Purchase

In addition to the discounted rate structure offered through the agreement, LifeGuard Medical will donate 1% of total volume to the American Heart Association on behalf of the institution.

More information is available on the LifeGuard Medical Solutions website at www.lifeguardmed.com.
